

$$2 \text{ times } 3 = \square$$

$$2 \times 3 = \square$$

$$\underline{\quad} \text{ times } \underline{\quad} = \square$$

$$\underline{\quad} \times \underline{\quad} = \square$$

$$\underline{\quad} \text{ times } \underline{\quad} = \square$$

$$4 \times \underline{\quad} = \square$$

$$\underline{\quad} \text{ times } \underline{\quad} = \square$$

$$\underline{\quad} \times \underline{\quad} = \square$$

Use cubes.

$$2 \text{ times } 6 = \underline{\quad}$$

$$4 \text{ times } 3 = \underline{\quad}$$

$$3 \text{ times } 7 = \underline{\quad}$$

$$5 \text{ times } 4 = \underline{\quad}$$

$$5 \text{ times } 3 = \underline{\quad}$$

$$2 \text{ times } 8 = \underline{\quad}$$

$$5 \times 2 = \underline{\quad}$$

$$4 \times 6 = \underline{\quad}$$

$$9 \times 2 = \underline{\quad}$$

$$3 \times 5 = \underline{\quad}$$

$$6 \times 2 = \underline{\quad}$$

$$4 \times 4 = \underline{\quad}$$

$$3 \times 8 = \underline{\quad}$$

$$5 \times 5 = \underline{\quad}$$

$$2 \times 10 = \underline{\quad}$$
